-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 28 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

**DETAILED ACTION**

1. Claims 1,4-5, and 6-26 have been amended.
2. Claim 3 has been cancelled.
3. Claims 1-2 and 4-26 are pending.

***Response to Arguments***

4. Applicant's arguments filed 28 December 2005 have been fully considered and they are persuasive.

***Specification***

5. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claims 7-25 are objected for failing to clearly define the term "computer readable medium".

***Claim Rejections - 35 USC § 101***

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 7-25 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In contrast, a claimed computer-readable medium encoded with a computer program is a computer element which defines structural and functional interrelationships between the computer program and the rest of the computer which permit the computer program's functionality to be realized, and is thus statutory. See Lowry, 32 F.3d at 1583-84, 32 USPQ2d at 1035. Accordingly, it is

important to distinguish claims that define descriptive material per se from claims that define statutory inventions.

Therefore, the executable instructions for an isolated operating environment and for a secondary operating system lacks functional descriptive material and is deemed nonstatutory.

***Allowable Subject Matter***

8. Claims **1-2,4-6 and 26** are allowed.

9. The following is a statement of reasons for the indication of allowable subject matter: The present invention is directed toward a method and system for securing a personal computer from malicious code contained in a file downloaded onto a personal computer from an external data source. Each independent claim identifies the uniquely distinct features **“providing an isolated secondary operating environment functioning separate from the primary operating system, controlling operations of the personal computer within the isolated secondary operating system, wherein the personal computer is secured from malicious code contained in a file downloaded from the external data source”**. The closest prior art, Tremain (Pub No. 2002/0069369) discloses a method and apparatus for providing computer services, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious. The closest prior, White et al. (US Patent No. 6,526,488) discloses a method and apparatus for controlling access to and corruption of information in a computer system, singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Art Unit: 2137

10. Therefore, **claims 1 and 26** and the respective **dependent claims 2 and 4-6** are in condition for allowance.
